# Four in a Row

## Addition and Subtraction Fluency Games

### Directions:

- **2 Players:** each player uses a different colored pen, marker, pencil, or crayon.
- **Goal:** First player to get four in a row wins! - up, down, or diagonal
- **How to Play:**
  - Decide who goes first and take turns solving problems.
  - Play starts on the bottom row and BUILDS UP!
  - Choose a problem, use an addition or subtraction strategy to solve the problem.
  - Put an **X** over each problem solved.

## Addition Strategies

### Counting On

$3+5$

Start with the bigger number and count on using your fingers.

5 - 6, 7, **8**

### Drawing a Picture

$7+2$

Draw in the shape of a tens frame.

Start with ● change to ×.

## Subtraction Strategies

### Counting On

$9-5$

Turn into an addition problem and count on using your fingers

$5 + \underline{\quad} = 9$

5 - 6, 7, 8, 9,

### Drawing a Picture

$6-4$

Draw in the shape of a tens frame. Draw a line to take away.
